📁 PROJECTS

01/2024 – 02/2024

Basket.lk Delivery App
The Basket.lk Delivery App, built with Flutter, facilitates efficient order delivery management.
Integrated with a Laravel Rest API backend, it enables delivery personnel to view and manage assigned orders, track delivery routes, and update order statuses in real-time.
With a focus on usability and performance, this app streamlines the delivery process, ensuring timely and accurate order fulfillment.

11/2023 – 01/2024	**Basket.lk Mobile App**
	This mobile app, developed using Flutter, provides users with a seamless shopping experience.
	Leveraging Laravel Rest API, it offers features such as product browsing, adding items to cart, and secure checkout.

02/2024 – 03/2024	**Lanka Erp**
	Sales Rep App
	The LankaErp Sales Rep App, powered by Flutter, is tailored for sales representatives to optimize their sales activities.
	Utilizing a Laravel Rest API backend, it provides functionalities such as customer management, order processing, and inventory tracking.
	Designed to enhance productivity and effectiveness, this app empowers sales reps with the tools they need to drive sales and deliver exceptional customer service.

04/2023 – 07/2023	**Hotel Booking System** ⧉
	Users can search for hotels based on various criteria such as location, check-in/out dates, and room types.
	The system allows users to view hotel details, including amenities, room types, and pricing.
	Users can make reservations by selecting rooms and providing their personal details.

05/2022 – 06/2022	**Online Food ordering System** ⧉
	This project is an Online Food Ordering System designed to facilitate the ordering and delivery of food from restaurants to customers' locations. It's a web-based application built using modern web technologies.

02/2024 – 04/2024	**Neo Medi Clinic System**
	The Neo Medi Clinic System, developed with PHP, is a comprehensive software platform designed to optimize clinic management. With features like patient management, appointment scheduling, billing, and more, it streamlines operations for modern medical facilities. Additionally, it offers functionalities such as channeling, purchasing, and tablet integration, ensuring seamless workflow integration and efficiency.

🗎 CERTIFICATES

University of Moratuwa- Full stack Development) ⧉
Successfully completed web design for beginners

University of Moratuwa- Full stack Development ⧉
Successfully completed front-end Development

Great Learning Academy ⧉
I have successfully completed the "PHP for Beginners

Great Learning Academy ⧉
I have successfully completed the "Android Application Development

🧩 ADDITIONAL SKILLS

Strong problem-solving and analytical skills.
Ability to work collaboratively in a team environment.
Self-motivated and eager to learn new technologies
